

Turnkey Enterprise Accounting & Distribution Tailored To Your Business

Don't trust your business to rigid off-the-shelf accounting software that doesn't fully meet your needs. Jedron has been designed from the ground up to be flexible enough to satisfy the financial, accounting, manufacturing, and distribution challenges specific to your business.

Turnkey Convenience / Tailored Flexibility

Much more than just a piece of software you install and maintain on your own, Jedron is a complete turnkey system that includes everything you require to successfully manage your company.

- ✓ A-List Hardware
- ✓ Fully Integrated Modular Software
- ✓ Engineered Customizations
- ✓ Implementation Assistance
- ✓ Data Conversion / Data Entry
- ✓ On-Site Training
- ✓ Ongoing Support

As a fully integrated modular system, Jedron allows you to purchase only the pieces you need, confident these components will work together seamlessly. And as your business grows and your requirements change, Jedron will adapt with you through the simple integration of additional modules.

Built-in communication capabilities including Electronic Data Interchange (EDI) save time by allowing you to exchange data with customers and suppliers automatically. For example, purchase orders can be transmitted to EDI-enabled vendors regardless of which systems those vendors use.

Jedron integrates PDF output into every module. Any and all reports can be saved as PDF files for onscreen viewing or exchange, thereby reducing unnecessary printing costs and making Jedron a "Green" solution.

Jedron's Standard Modules

- ✓ Accounts Payable
- ✓ Accounts Receivable
- ✓ General Ledger
- ✓ Inventory Management System
- ✓ Manufacturing System
- ✓ Order Entry
- ✓ Payroll
- ✓ Point-of-Sale Invoicing
- ✓ Purchase Order System
- ✓ Sales Analysis

Weldpak

Weldpak, our flagship module, has been specifically designed to meet the unique needs of industrial gas and welding supply distributors with cylinder tracking, rental/demurrage billing, and lease management for both individual cylinders and cylinder groups in any combination. Define cylinders and gas groups in any manner you wish, such as by high and low pressure, industrial gases, or specialty gases.

Weldpak is fully integrated with the other Jedron modules, meaning you only need to enter data once. Invoice a customer for a cylinder lease in the Weldpak module, and the Accounts Receivable module immediately reflects that transaction.

"Jedron has helped our business tremendously and LTL has customized it just to suit our needs. We couldn't do it without them." – J. Viergutz, Western Canada Welding Product, Alberta

Outstanding Support Where And When You Need It

LTL Technology's reputation is built on unparalleled customer support that begins the moment you contact us.

First, our analysts carefully listen to your requirements and tailor a system to match your unique specifications.

Then, our comprehensive JEDRON 1-2-3 Installation Program ensures a smooth transition from your legacy software to full productivity with Jedron, including training, data migration, personalization, report customization, and more.

Afterward, we're always available when you need us. Ongoing support is provided via our Hotline, staffed by trained, experienced professionals dedicated to ensuring you get the most from your Jedron application. Through our secure remote dial-in capability built into the Jedron system, our support engineers can diagnose, update, and repair your system with minimal interruption to your business.

Built-In Peace Of Mind

The Jedron system is built upon a solid Unix foundation, inherently more secure than other commercial operating systems, more resistant to intrusion, viruses, and other malware.

The application itself has been designed to offer fine-grained security:

- ✓ Control access to information by module, by user, and by field.
- ✓ Define specific fields as read-only, allowing designated users to view information but not alter it.
- ✓ Log all transactions and generate an audit trail for later review.
- ✓ Adjust to staff and responsibility changes through simple-to-use administration tools.
- ✓ Backup data through a reliable backup system or integration with your existing backup processes.

LTL Technologies: Dedicated To Your Success

For more than 25 years, LTL Technologies has partnered with industry-leading hardware and software vendors to deliver a unified, best-in-class business intelligence application. Our hundreds of satisfied customers spanning a diverse range of industries testify to our success.

Contact LTL Technologies today to find out why Jedron is the solution of choice for your accounting and distribution system needs.

"Jedron allows us the flexibility to gather information. They understand our type of business and adapt to it. Their customer service is just fantastic." – D. Fulford, Tiremaster Limited, Ontario

"I've worked with Jedron for twenty-five years. It allows us to run our business with a minimum administrative component. LTL is very responsive, understanding, and intuitive." – A. Snow, Bedford Furniture Ind. Inc., Ontario

The screenshot shows a terminal window titled "S150 (K) jed60 RON 09JN10 10:26 @JEDRON SOFTWARE (C) LTL Technologies Inc. - TinyTERM". The interface displays a menu of 36 numbered options, including "Change Terminal Date & Time", "Jedron Control Files", "Accounts Receivable Files", "Cylinder Files", "Cylinder Initial Load Pgns", "Cylinder Control Programs", "Inventory Files", "Inventory Control", "Purchase Order System", "Rental Equipment Files/Prgrm", "Order Processing", "Invoicing", "Point of Sale System", "Inter System Updates", "Multi Use Comment Maintenance", "Mail List Management", "Accounts Receivable Functions", "Inquiries & Order Reports", "Bulk Gas System..Version 1", "Bulk Gas System..Version 2", "Auto Order/Invoicing", "Transfer Revenue System", "Truck Delivery System", "Delivery Scheduling/Manifests", "Sales Analysis", "Fuel Delivery System", "Accounts Payable", "General Ledger", "Payroll", "Job Streams", "Month / Year End Procedures", "Standard Comment Files", "User Utility Programs", "Preset Key Change Procedures", "Supplier Price Updates", and "Custom Programs". At the bottom, there is a "SELECTION:" prompt, a "PHONE 08SE22" field, and a row of function keys: T, F9, WHO, WHAT, #, TE, LOF, HELP. The footer of the terminal window reads "JEDRON SOFTWARE (C) LTL TECHNOLOGIES INC. ?".

Jedron's intuitive character-based interface makes for rapid data entry and easy application control.
